

Kit Reference: NSK2251SMF

Fitting Information: NSK2251SMF

The Solid Mass Flywheel in EXEDY kit NSK2251SMF was developed to replace the LUK Dual Mass Flywheel (OE ref: 12310-VD220).

NSK2251SMF cannot be used if the vehicle is fitted with the earlier EXEDY Dual Mass Flywheel (OE ref: 12310-VC105). If the vehicle has the earlier EXEDY Dual Mass Flywheel a different kit is required: NSK2292SMF.

The LUK Dual Mass Flywheel and the EXEDY Dual Mass Flywheel are not interchangeable as the crank bolt length varies between the two flywheels. Failure to install the appropriate flywheel will result in significant damage to the clutch, flywheel and or flywheel bolts.

EXEDY Kit	Replaces	Flywheel Bolt Length
NSK2251SMF	LUK Dual Mass Flywheel	76mm
NSK2292SMF	EXEDY Dual Mass Flywheel	70mm

The LUK Dual Mass Flywheel fitted to the Nissan Patrol Y61 is bolted to a flex flywheel that incorporates a ring gear; the installer needs to unbolt the flex plate and fit it to the EXEDY Solid Mass Flywheel found in NSK2251SMF.
